

ATTENTION CLINICAL SUPERVISORS:

Please watch the dates on your letter carefully as the Board is no longer associating your license expiration date with your compliance with the clinical supervisor education requirements. The two processes are distinct and evaluated separately.

- For your compliance period ending on or after January 1, 2018, the tutorial is required to meet the requirements, and your compliance period will be extended **THREE** years from the date you become compliant.
- For example: if you take a 6 hour refresher course on March 15, 2018 and the tutorial on March 23, 2018, you become compliant **ON** March 23, 2018 and will be for **THREE** years, expiring on March 22, 2021.
- If your letter indicates you are compliant until March 22, 2021, to gain another full 3 years it would be in your interest to complete either the 6 hours of continuing education or the tutorial near the end of your compliance period as that will start the next three year period.
